OUR APPROACH

We coordinate with clients, contractors, supervisors and project teams to understand site requirements, plan the work sequence, execute the installation correctly, and complete testing and handover in an organized manner.

Q

QUALITY

Attention to workmanship and installation details.

S

SAFETY

Safe working practices and appropriate tools.

R

RELIABILITY

Planned execution and responsive service.

C

COMMITMENT

Focus on client requirements and timely completion.

Our AC & HVAC Services

From first-fix copper piping to final commissioning, we deliver the complete scope your AC system needs.

01 AC INSTALLATION

Split AC, ducted split, cassette, package and related indoor/outdoor unit installation.

02 AC MAINTENANCE

Preventive maintenance, inspection, troubleshooting and corrective works.

03 REFRIGERANT WORKS

Leak checking, refrigerant line preparation, vacuuming and refrigerant charging support.

04 DRAINAGE WORKS

AC condensate drain piping, routing, supports and proper slope arrangements.

05 INSULATION WORKS

Thermal insulation for refrigerant piping and related finishing/protection.

06 TESTING & COMMISSIONING

Pressure testing, vacuum testing, operational checks and commissioning assistance.

OUR SPECIALTY

AC Copper Pipe Installation

Careful routing, fixing, jointing, insulation, pressure testing and commissioning prep.

- Liquid and suction line installation
- Brazing and jointing
- Pressure and leak testing
- Thermal insulation and protection
- Pipe cutting, bending, routing and fixing
- Pipe supports and clamps
- Vacuum testing
- Preparation for system commissioning

OUR WORK PROCESS

1 SITE INSPECTION

Review AC locations, pipe routes and site conditions.

2 PLANNING

Coordinate drawings, routes, materials and work sequence.

3 INSTALLATION

Install copper pipes, insulation, supports and related works.

4 TESTING

Carry out pressure/leak checks and vacuuming as applicable.

5 COMMISSIONING

Assist with operational checks and system start-up.

6 HANDOVER

Complete inspection, rectification and final handover.

WHY CHOOSE US

Capabilities & Commitment

PROJECT SUPPORT

We support contractors, facility operators, building owners and project teams with AC piping and HVAC-related site works. Our scope adapts to project size, drawings, specifications and site conditions.

QUALITY & SAFETY

We prioritize proper material handling, secure pipe supports, clean workmanship, appropriate insulation, safe brazing practices, pressure testing and site housekeeping. Work is coordinated with applicable project requirements and manufacturer instructions.

WHY WORK WITH US

1

Professional AC copper piping installation

2

Experienced, site-oriented work approach

3

Quality-focused workmanship

4

Organized testing and handover support

5

Residential, commercial and project applications

6

Flexible support for installation, modification and maintenance
